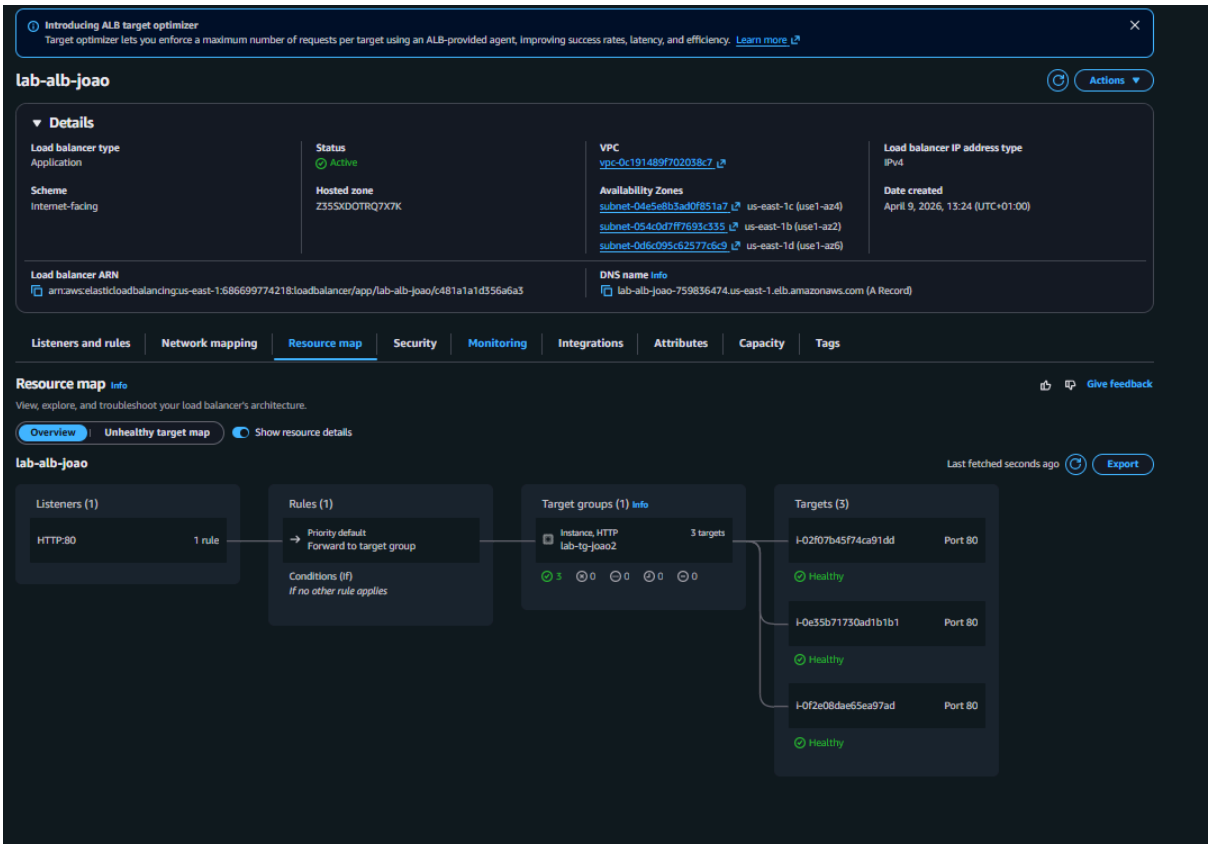
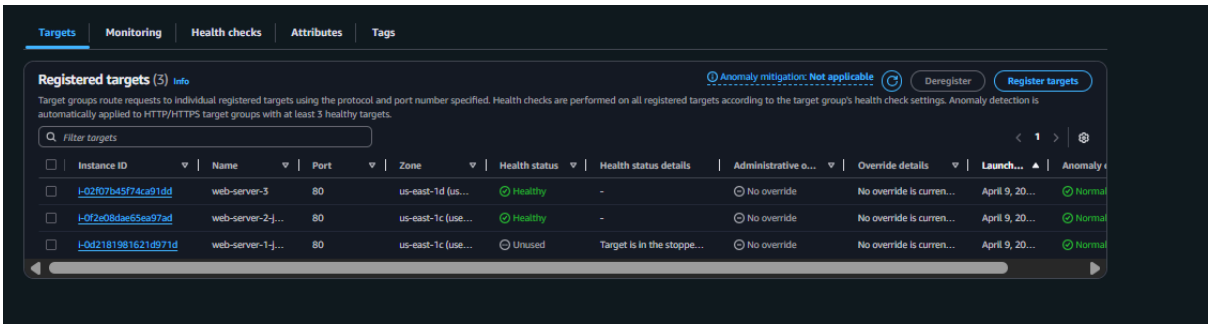
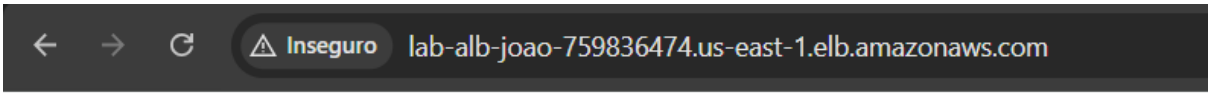
Load Balancer (joão)
I added more than two AZ so that LB could access my instances. ((I created a new instance (web-server-1) on a new AZ (b))



When I stop using the instance this happen:

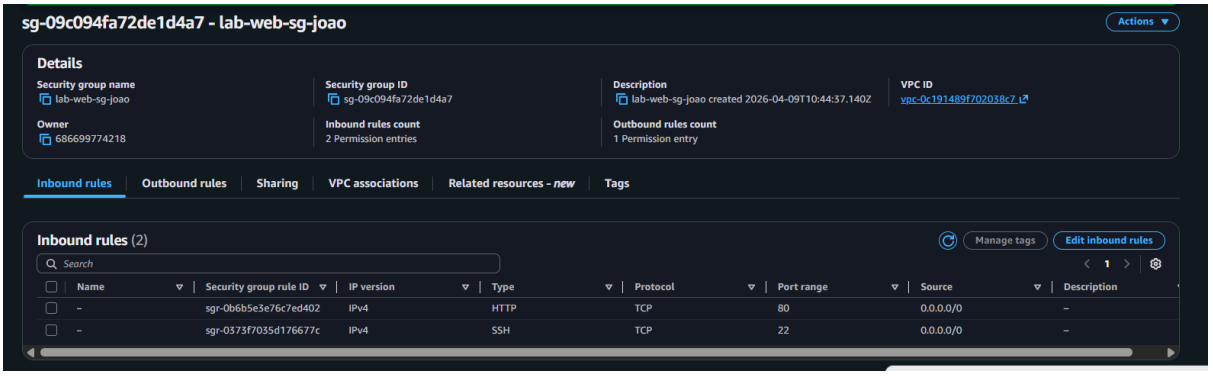


When I open the Labs Url:

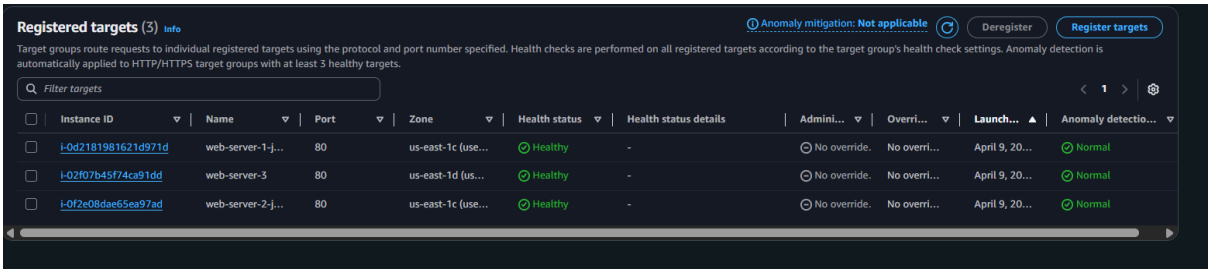


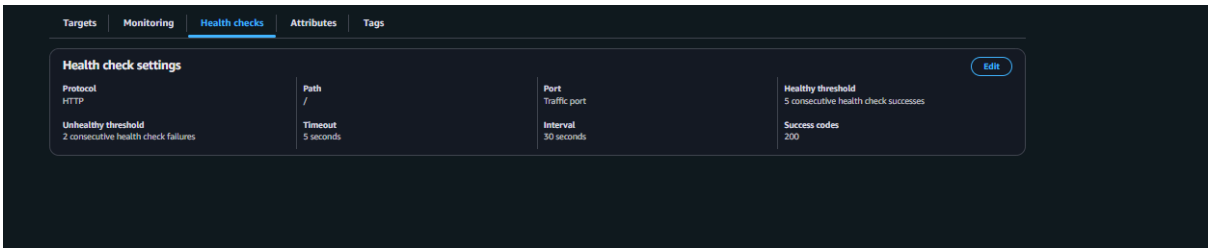
Hello from Web Server 3

My Security Group:



After turning on the instance ((I created a new instance (web-server-1) on a new AZ (b)):





Health Check:
